Whenever I click my website and click the menu, the app shows up. The problem is I can't load the URL in my computer. I have done other websites, for example, if you open google.com in your computer, the red address bar in chrome will show what websites you visited at the past 5 minutes. But my current website cannot show the URL when I entered the site. Even though I can access the app via the search bar on my computer, I can't load the site. My app is in the production mode, so it won't work when I run my app as it works in a debug mode. Can someone help? Thanks. A: I found the issue. I have developed a new project at the same time with Firebase, and it seems I was using the same project's path. I have just removed that path and installed the app again and it worked. Martin Carrier has been jailed after admitting child cruelty. Martin Carrier has been jailed after admitting child cruelty. A FATHER has been jailed for 11 years after admitting child cruelty. The 42-year-old from Ballyshannon, Co Donegal, left his baby daughter at the care of his girlfriend's
