Q: How to create a click event using onclick attribute in svg How do I create a click event for an svg element, using an onclick attribute like shown below Click me I tried various combinations of code in html, but it did not work. Click me Click me A: I suggest you use event listener with the click event. By using this you can have the event listener on only the div/button/other element you want, as the listener will still be attached to all the descendant elements. // Listener for all `*` elements document.querySelectorAll('*').forEach((el) => { el.addEventListener('click', function () { alert('An alert box!'); }); }); Click me
