Today, AutoCAD is one of the most widely used drawing programs in the world. With more than 8 million users, it is ranked by Canals in the "third tier of global CAD software," behind Autodesk Inventor and CorelDRAW. Video: A history of AutoCAD Video: What are you really doing when you use AutoCAD? On-the-go Drafting AutoCAD is designed for designers who spend most of their time on the road. Available on iOS, Android, Kindle Fire, Fire Phone, and other platforms, AutoCAD can be used from almost anywhere. AutoCAD Mobile app for iOS Open to Any Designer AutoCAD is a platform-agnostic application. Unlike conventional CAD applications, which are designed around a particular CAD platform, AutoCAD provides a streamlined user experience. While drawing at an on-site client's site, a user can easily switch between the app and the desktop interface, or share a drawing and collaborate with others. Designers can use AutoCAD from virtually any device with a web browser. For on-the-go users, AutoCAD has more than 500 native mobile apps that provide intuitive functionality on mobile devices. And with its powerful cloud-based data, mobile apps, and mobile and web interfaces, AutoCAD can take an even larger slice of the CAD market share. AutoCAD is the centerpiece of the Autodesk On Demand platform, which also includes AutoCAD 360° and other complementary applications. Designers in any discipline can utilize AutoCAD for: Drafting Mobile Designers can create and view drawings directly on mobile devices. Just open and save documents as usual, but if the device is an iPad or iPhone, a user is also able to access the drawing tablet directly. AutoCAD Mobile Design In addition to viewing the drawing, a user can: Draw directly on the screen of the iPad or iPhone using the touch interface. Work with the latest and most complete feature set available in AutoCAD, including AutoCAD LT, WebCAM, and other products. Create and manage their own undo history. Architecture AutoCAD Architecture has a relatively large number of extensions and third-party applications that support them. Architects and builders can create room-plans, monuments, buildings and large-scale structures. The following are some of the more common applications: Polyline Earth Wall-Slicing CAD Components Structural Analyzers Inventor Geomagic Measure Mechanical Fine Design Vectorworks Dreamweaver 3D Architect Project Architect What's New in AutoCAD 2019 Product Listing and Navigation The product list is divided into two categories: "New Products" and "Standalone Products". The list is sorted by Product Name, with the standard sorting order. If needed, the user can sort by "Status" (New, In use, Unavailable), Last Visit Date, Last Review Date, Updated Date, Date Added, Last Review, Last Update, Name, and Manufacturer. If the user chooses to sort the list, the scroll bar will appear below the product list. In the list, the user is presented with all the products sorted in the selected sorting order. If the user clicks on a product name, the product information page will be displayed. The information page contains all the product details such as product name, manufacturer, number of users, number of user reviews, latest review date, description, and available versions. The latest version is the default page displayed if the user clicks on the product name. Product names are clickable links to the product's information page. On the product information page, there is an image, a short description, and a list of the product's versions. The user can click on a version number to view the version's information. The user can easily navigate between the product's information pages using product names or version numbers. All the products are searchable by searching the product name and manufacturer. A product with the same name and manufacturer can be easily located by searching the name of the product. The product list is also divided into two categories: "CAD" and "AutoCAD". The "CAD" category contains all the AutoCAD products and the "AutoCAD" category contains all the AutoCAD 2017 products. The list is sorted by Product Name, with the standard sorting order. If needed, the user can sort by "Last Updated", "Last Review Date", "Name", and "Manufacturer". If the user clicks on a product a1d647c40b
