### **Contacts Sync Download**

Contacts Sync is a lightweight software solution designed to help you synchronize all your contacts between Outlook and your Gmail account. The application displays a user-friendly interface and enables you to easily access all its functions without wasting any time. Besides this, the entire process of transferring the contacts from Outlook to

---

Gmail and the other way around is as simple as can be. You merely provide the app with Gmail profile information such as username and password, select the Outlook contacts folder you want to sync with, choose the transfer direction and then just click the ‘Synchronize’ button. It’s all very straightforward, comprehensive and leaves very little room for error. Contacts Sync can also be used as a simple means of recovering contacts from one account and copying them to the other. With it, it’s easy to retrieve information such as notes, webpage, job title, name, email, company name, business and much more. Moreover, the application comes with an auto synchronization feature which allows you to use it as a backup

---

tool as well. You get to set the number of minutes in which Contacts Sync performs an auto sync and this way your contacts are updated. Contacts Sync is designed to be able to support multiple sync profiles in case you need to transfer from them. Taking advantage of this means that you can synchronize your accounts to one place without having to worry about overwriting information or contact conflicts. The application enables you to choose which one of the accounts is the master one. While it is active, Contacts Sync can be run in the background and is capable of displaying notifications when a synchronization occurs. To sum things up, if you're looking for a simple and practical means of transferring contacts

---

between Outlook and Gmail, then you can certainly try Contacts Sync. The Best Free Contact Manager Software for Google Contacts for Android It is a very simple, easy-to-use and reliable application designed to help you manage your Gmail contacts. It's a useful and powerful tool for an Android user. The application allows you to sync Gmail contacts with Outlook, import contacts, and generate events. Besides this, the app has a simple interface which makes it possible to quickly and efficiently manage your contacts. Furthermore, the application comes with a full contact editor, allows you to assign a color to your contacts, as well as an ID number and is able to auto sort them. You can easily organize

---

your contacts according to their group or project and can sort them

### Contacts Sync

Keymacro turns your keyboard into a macro keyboard. To use this application, you just need to open the program, set the keys you want to use for your macros and you're good to go.

There are pre-set macros for popular applications including Microsoft Office, Internet Explorer, Mozilla Firefox, Adobe Acrobat Reader, Macromedia Dreamweaver and others. To save you time, the application also allows you to create your own macros. To make your life a little easier, the application

---

has been specially designed with 10 independent macro sections. This means that the application gives you the freedom to choose the keys you want to use for your macros.

What's more, the application is capable of storing all your macros in a database. You can also store different macro definitions, export and import them and more. All this makes

Keymacro a great software solution for computer users who are looking for a way to set custom macros. KEYMACRO Macros can be assigned to the Keys (Menu) or to the Keys (Windows) window. Keymacro comes in a free edition as well as a pro edition. The pro edition costs \$19.95 while the free version comes with the same 10 different macro sections as the pro

---

version. If you want to create your own macros, you have to pay \$9.95 per month for unlimited use of this feature. Keymacro description: Keymacro turns your keyboard into a macro keyboard.
