The response was, naturally, unenthusiastic. In fact, there was some very strong commentary suggesting that the CPUC had made a mistake, was desperate for revenue, and would much rather raise rates for businesses, the public, and consumers than for the very rich. As a result, it was clear to me that the CPUC was not going to win over the public. But could it be that this is exactly what the CPUC and the oligarchs behind the plan wanted all along? a1d647c40b

Automatic Text Rotation: Rotate text automatically. Adjust the rotation to keep your text readable, and update the angle and skew automatically when text is placed on a rotated surface. Dynamically Resizable Grids: Receive a new (resizable) Layout document with a new grid that matches the paper size of the current drawing area. Use it to easily adjust the scale of objects within your design to fit the desired paper size. 3D Curves and 3D Polylines: Create and export 3D curves and polylines directly from the command line. Decoupled Documents: Decouple documents from the drawing (i.e. files are saved as.db3 files, not as.dwg files). This enables you to easily distribute a single.db3 file to all users. System Requirements For AutoCAD:

The amount of RAM required for the game is variable, so it depends on the amount of files loaded and things like that. It's about 800mb for the client side. The server side is around 2.5gb. If you have less than 1024mb of RAM, you will not be able to play the client. You need a minimum of 1gb for the client. All other requirements for a server run should be obvious.
