
AutoCAD Crack (LifeTime) Activation Code

AutoCAD

The first release of AutoCAD was an on-screen version of Autodesk's 1982 CAD program, called "AutoCAD" or AutoCAD-1. This was followed in late 1982 by AutoCAD for the IBM PC platform, the first commercial CAD application for the PC. In 1984 Autodesk rebranded its products for the PC platform as "AutoCAD", the number 1 in the company's own numbering scheme. To distinguish this product from the first PC-based on-screen CAD system, Autodesk titled it "AutoCAD-1". This is the version of AutoCAD that the first Autodesk owners received. In 1985 the next version, "AutoCAD-2", was released as a desktop application (with an option for a later "AutoCAD-3" version for the Macintosh platform) to the public and the number 2 was officially replaced with the number "1" as the code name for the product. The first released on-screen product from Autodesk was AutoCAD-1 for the IBM PC platform. For this original on-screen version, Autodesk bought the rights to the DOS operating system from Microsoft, and modified it to run AutoCAD-1. With the Autodesk name and logo added, it became known as "AutoCAD with DOS Graphics" or "DOS-AutoCAD". AutoCAD-1 allowed for multiple graphic areas that could be printed or saved.
