As a multi-choice game, you can also have the free choice of a wide range of character classes, including the role of tanks. Each tank can hold a certain amount of explosive, and it can be used to free an enemy tank and bring it to you. Using a tank in battle is more efficient, as the firepower is similar to that of a large sized tank. MECHA AND ITEM: There are many vehicles in the game, and they are equipped with a variety of special weapons. Vehicles are also a unique mobile equipment, and each has its own special features. *Character Classes There are several classes of characters: Tank Driver, Engineer, Tank Gunner, ACV driver, ACV Gunner. Now, I will introduce two ways in detail, although the special features of the other character classes are as follows. * Tank Driver Main Task: The tank driver possesses an ATGM at his disposal, and can also use it to free the tank, bring it to an enemy, or to destroy it. For example, when you are driving a tank, in the process of driving the other tank, you can drive it to a nearby enemy tank and use the ATGM to destroy it. Shell Type:Shell Type: Mainly includes APCs, ATGs, ATVs, ATGVs, and Tesla types. In addition, you can also use the splattered bullet for difficult enemy tanks that appear at a great distance. Command Skill:Command Skill: To speak is the skill of command tanks, and can easily be used to clear the side, bring the tank in the direction of the movement, or the command of the tank's commander. Engineer Main Task: The engineer can remotely control the tank battery. He can also use a repair bag to repair the tank, and can also use a repair tool to repair the tank.The engineer can also use an explosive charge to destroy the tank, and can also repair a nearby vehicle by himself. The explosive charge can be upgraded by a repair tool. Shell Type: Only includes APCs, GSS, PSVs, and Militiamen types. As for the explosive charge, it can be used to destroy the tank and to damage enemy tanks. Command Skill:The engineer is the most important part of the tank. What's new:

Back in 2001, while I was working on the ALLEGED UFO conspiracy, I was asked to do a memoir of my own parents, as well as an abridged biography of my father. The book has yet to be published, though I've posted the information for it on Google Groups. My mother's memoir, "Salud" (her English version of "L'addio") contains some tidbits of what she knew, which I'll try to fill out and regurgitate here. My father's bio was simple: He was born in 1932, went to work for the US Army in Paris in the 1960's, became active in Masonic orders there and then found the UFO satanic conspiracy when he lived in Portugal and came across a strange literature for that purpose on the Tithonium the left the group in 1973 after a series of shock experiences. As I've now spent a fair amount of time researching my parents, it's time to re-examine the whole topic. It was the so-called "Roswell skills" - the "Roswell Technology" - the supposed ability to fly a craft large enough to (the claim is made) house an alien reanimation and or cargo, that made the belief so intolerable. Although the "skills" seemed to be a growth in the early 1990's, with the scouring of Vatican archives under the direction of Pope John Paul II, they had been around before. There are good signs that a jet-liner with the capability to take off at an altitude of 30-50,000 ft. is possible. For example, Dr. C. M. Futrell (who died in 1984) could get a jet-plane to cruise at 26,000 ft. in the air and techniques of that level were used by many military aircraft who strafed each other in the big war. What I believe happened was that those efforts at high altitude naval spook aircraft began in 1980-81 with the something called Aviation Club of the Devil, or ACOD, coming on the scene. ACOD used Italian-built F-117 Nighthawks, plus I suspect, the prototype F-117B/C-1. These guys have been proven to be able to develop a long-range, high-speed aircraft which can refuel from aerial
