Important Notes about the Playable Characters

- There are two separate Soul systems: the Player Soul and the Character Soul. A dead character will lose its Player Soul, which is dead if the character is left by its owner. A dead character will not lose its Character Soul. Because the Character Soul is not affected by death, in order for a dead character to return to its owner after its death, a player must be called to the dead character's location and request the character to be returned.
Character Souls will return to the Owner the moment the character dies.
- Once called to the location of a dead character, the owner can return the character by donating a character soul from her/his inventory at the corpse. However, this method incurs heavy demand on her/his in-game

resources and will take a long time to complete. The method will be available if the owner is in the active party.

Cellsis a wonder

Research on satellite cells made possible by Kupicoïn and chanGGok. Here is some information on satellite cells and why Kupicoïn are trying to make them!

[basic data]

Cells that are capable of converting to multi-nucleated cells (polyploidy), and multi-nucleated (diploid) cells that can be formed by mitosis.

HSCs are the source of blood cells, such as red blood cells, white blood cells, and platelets.

Satellite stem cells are derived from HSCs.

Function is the same as HSC.
