In every match, teams will have an upgraded and dynamic artificial intelligence (AI) system that plays using real-world data and the in-game intelligence of millions of FIFA players. "FIFA has been putting players' skills and data against one another for years in our tournaments," said Alex Mallampalli, Creative Director, FIFA. "With FIFA 22, fans will find out in real-time how their team performs in comparison to their opponents in a completely authentic game environment." "FIFA 22 has introduced the 'match engine,' which revolutionizes how players get better and smarter over time. Now, in addition to the energy, reactions, stamina and technique of a player, they will also get the ability to make adjustments. A player can react faster to an advantage and take smarter, more precise shots," said Steve Pick. PlayStation 4 and PS Vita will receive a feature update on Nov. 18, adding the above.

A pipe bomb has been intercepted on the streets of a major city on the US-Mexico border, threatening to disrupt "border security operations" and kill people, according to a report. State authorities said the device was detonated by residents in a town roughly 100km north-west of the border city of McAllen, Texas, early on Sunday. It has since been recovered and relocated. The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) is working with local law enforcement agencies to investigate and arrest the person or persons who assembled it. The McAllen Fire Department, Texas Department of Public Safety and US Border Patrol agents responded to the scene, and no injuries have been reported. There have been no confirmed reports of secondary explosions, and no further threats to public safety. The FBI's Joint Terrorism Task Force, along with the

McAllen Police Department and Homeland Security Investigations, are investigating the incident. "We cannot speculate on possible motives or the identity of those responsible for the pipe bomb, but what we can say with certainty is that ATF will not stop until we identify the person or persons responsible

1. Cristiano Ronaldo Combines explosive pace and control to become a nightmare for defenders to deal with. He's the prime example of a premier playmaker, operating in the final third of the pitch to create chances for his teammates. He might not create many chances for himself, but he's always a threat.
2. Neymar Incredible dribbling ability gives him the edge over most players at the same level. Combine that with his accuracy in the air and the 25-year-old's ability to link play well is arguably one of the best in the world.
3. Lionel Messi The Argentine maestro's world-class goal-scoring ability has been on show for all to see, but it's his combination of pace and precision on the ball that makes him so difficult to play against. The best goal-scorer in the world since he hit his 21st goal for Argentina in the 2014 FIFA World Cup™, Lionel Messi proved that he's on an incredible run as he guided his team to its third consecutive FIFA Club World Cup title.
