Gang: The main story revolves around the player's aim to finish the job by fighting against the gang. Story: The game has three voiceovers, one for each stage. The voiceovers are voiced by one of the three leading female voice actors from "OrangeJuice", Hiromi Iwanaga, Kaori Oda, and Miyako Sakai. The story is set in the mid-1980's in the suburban area where the player spends most of his time. Characters and the story are inspired by the light novels and anime called SUGURI. Release The game is distributed by ASCII Media Works, Inc. in Europe and by D3 Publisher in North America. The full version release date for the game is March 2, 2017 (WiiU) and June 19, 2017 (3DS). #### What's new:

MacOS Gold Crusader Remastered Edition MacOS OverviewA remastered version of Gold Crusader, one of the earliest and most influential Trojan horse viruses of the 21st century. Gold Crusader Remastered Edition (GoldCrus.dmg) contains support for a Mac, iOS, and Android devices. It has important new features such as SOS support, toggle switch, history, new GUIs with configurable backgrounds, and a new design. Early in 2006, a new 3-stage Trojan virus, called Gold Crusader, first appeared in the wild. Targeting Microsoft Windows users, Gold Crusader was released in stages. The earlier versions of Gold Crusader were detected by the NameCheap McAfee VirusScanner and Symantec VirusScanner. In addition, it was included in the infamous 5.0/5.1/5.2 versions of the infamous SpankWare Trojan of 2006, and the 7.0/7.1 version of the infamous Blaster Worm Trojan which was also released that year and which created 1.5 million victim machines in about 18 hours. According to Symantec's Symantec Lab, a fully-fledged Trojan had been written by the "Gold Crusader" developers, and the virus had been clandestinely distributed through underground networks. Reverse Engineering DetailsWhen I first saw Gold Crusader, I discovered it was just a modified version of the infamous Sasser virus which was classified as part of the Shamoon virus by the 'People in the Shadows' community. Sasser, famous for its quick attack on SCO Unix System V servers in 2001, was an exploit virus which downloaded a backdoor key from a British Bank and then attacked senior management systems to gain control. Unfortunately, this was only before Sasser became well known, and because of this it was not judged in the same light as the Shamoon virus which only released an attack package for which there was already an existing exploit. The only hint that Sasser was classified as a virus in 2001 appeared in the form of a fresh "Sasser" website. One of the interesting aspects of this C&C structure in Sasser was a business C&C server with the address "55.132.3.214". Investigating this resulted in a Java object which had a strange serial number of 2bc0198d, and since it matched the first version of Gold Crusader (2bc01) we could see that Sasser was also a descendent of Gold Crusader.

Death Park 2 is a horror game inspired by a popular song called "Dreams" by artist, songwriter and producer Lindsay Chase. Death Park 2 is a 4-player cooperative horror shooter. You will solve various puzzles and fight against a scary clown and various monsters. Part 1: Lost in Dreams can be played alone or with other friends. Part 2: Applying For A Job is 2 player game.
