An AI controlled mountain with many secrets, mysteries and exploits, Mt. Aki features some of the deepest and biggest dungeons of the Undergrowth. The mountain is just one of the many items found in this VR maze, that were once a part of the world. Enjoy the VR maze from the comfort of your own home. Within the maze you will find museums, artwork, cave cranes, cafes, and much more. You are the only one who can enter the maze. Only you and Xera the Biomech! If you liked this video please give it a thumbs up! Thank you so much! Thank you for your time and have a good day :) A: Undergrowth: VR Maze It's a problem caused by the ui scaling issue. When you have non-native dpi scaling the video gives the illusion of the content it's supposed to be displayed on. Even if you put dpi=1 you get the scaling

issue. For a while in the past a fairly simple solution was to put res=1 in the game to get the experience out and into more people's hands. Unfortunately this isn't really an option these days and is more of a hit to your fps. There is a solution that keeps most things nice and pretty but does force the system to downscale the image and scale it on the fly. Most likely the fastest way to go about this is to start out with the relative scaling factor of 25 and then bring the image down to 1.5 times that, since that will likely account for any additional scaling by the program. Here is a link to a thread on the Steam forums that has some information on this and there are solutions that are mentioned in there as well.
