Åâ€Q: Как организовать очередь с пропуском времени? Доброй ночи, подскажите пожалуйста, как сделать очередь с пропуском времени в dbase. Например, есть объект и есть его дочерний объект. Необходимо, чтобы через некоторое время не выдавались по строке дочерние, а при первой записи их комбинировались. Ничего более не могу понять и прошу помощи. А: Ну вот так в цикле будет хвататься объекты и добавлять их
