More info, some info, and info, and a link. Just let me know in the comments below if you want me to make any more vidoes about game development so that I can give credit where credit is due! :) ***** I also need help! The game is still in a pre-alpha state, which is a pretty big deal.

If you've played Clicker Heroes and are familiar with what that game is like, you can already guess that TtInfinity might be just like it. If that's the case, that's great, but it also means that there are still a lot of things in the game that need to be fleshed out to make a proper game. Here are the most important things that I'd really like to have you guys help with: --- The Gameplay --- ★ Code and improve the existing gameplay. ★ Code level layouts and level design for more levels, more bosses, and more gameplay. ★ Find out what more is needed to make the game fully playable and what's missing. --- The Storyline --- ★ Make the story more dynamic and interesting. --- The Interface --- ★ Make the UI more attractive and accessible
