View post on Digg . world traveling to china free download - Microsoft Office Excel 2016 Download free - Just browsing stuff for a short while before noticing the following report on IPL (net) which I dont want. world traveling to china free download RENE | WEB apple ebooks mac store bookstore download . apple ebooks mac store bookstore download {0}Rene listed as interface: {0} (click to check out the running script) 0.0.0.0(0) 06-04-2020, 09:19 AMQ: How to get a List back from Play 2.3 template? I would like to know how to get a List from a template? The function for this that I'm using right now is a Map: object TemplateHelper { def getList(templateName: String, obj: play.api.mvc.AnyContent) = { Seq("list", s"" \$obj "") .filterNot(p => s"\$templateName"!= p) } def getListFromDb(templateName: String, db: Db)(collection: JdbcCollection): JList = db.withSession { collection.find(t => templateName == t.template).headOption.map(t =>...).map(getList(templateName, t)) } def getListFromCsvFile(templateName: String, csv: String)(collection: JdbcCollection): JList = csv.map(s => db.withSession { collection.find(t => templateName == t.template).headOption.map(t =>...).map(getList(templateName, t)) }) } In the example, I'm trying to get all entries from a table where the template name is the same as a string passed to the template, so I would like to call the function getList("book", "Hello World"). What I would want is to return all the template names, but nothing is there for me to do that, and I have no idea how to get to the template from the template name, or which
