## **CryptoSticky Pro (formerly YellowMemo) Free License Key [Win/Mac]**

[Download](#)

### **CryptoSticky Pro (formerly YellowMemo) Crack**

CryptoSticky is a simple to use application that allows you to write down everything, and more. Used to help organize all the things in your life. If you had to take notes while in class, in meetings, or while surfing the web, CryptoSticky can help you to write down what you'd like to

---

remember. Not only that, you can create various types of sticky. You can create sticky notes, Post-It Notes, or double sticky notes. You can also create sub-stickies. These can be anywhere from a simple sentence, to a full explanation of an event. You can write down notes on napkins, sheets of paper, on your hand, if you want to. The possibilities are endless. You can also create a voice memo. With the voice memo capability, you can record a

---

message that will be saved and played back to you (if you would like). This is perfect for when you are on the move. CryptoSticky can work on both PC and Mac. However, it is best to use the PC version for a few reasons. The PC version has a stronger encryption system. The PC version also has more features than the Mac version, such as the ability to create sticky notes in different sizes, sync sticky notes (i.e. put the same

---

sticky on different computers), the ability to create multiple windows (you can open more than one window at a time), and the ability to create sticky notes on napkins (i.e. when you are not able to write on a paper). You can sync your stickies to the cloud. This is done with the mobile app called StickySync. As of version 10, the mobile app also comes with photo sharing to allow you to share digital photos with other people (or groups

---

of people). Software Requirements: CryptoSticky Pro supports the following versions of Windows (XP, Vista, 7) and Mac OS X. Verdict: CryptoSticky is a utility that allows you to keep notes, make voice memos, and to organize your life. It is also an easy to use, robust application with a diverse feature list. **CryptoSticky Pro (formerly YellowMemo) Crack License Code & Keygen**

---

YellowMemo is a very simple, easy to use application, that helps you organize, manage and track your daily tasks. It can store all the stuff that other sticky notes applications can do, plus more... Like it? Share with your friends! Other Windows Software of Developer «Advanced Software Technologies»: AUTHOR'S NOTE: CryptoSticky is a common phrase; it is the word for a note or a sticker;

---

usually one with a picture. It is also a common letter. Probably the most famous and used word in Cryptology, but it is used in many other forms. It is almost impossible to google, with every form of the word. Even when you have a good idea of the original form, a google search in its many modified forms is usually not successful; the results are so numerous, it can be seen as an art of its own. This is where CryptoSticky comes into play,

---

is a very basic form of Cryptology. Not only does it store your messages like a sticky note, its creation is even more simple, with a single use button. You can create a new sticky at any time, anywhere. The use of the common form of the word CryptoSticky is the key to this application. It may not have reached an advanced level, but it is fun and easy to use. CryptoSticky is a very simple to use application especially designed to help you organize

---

and keep track of various daily tasks. CryptoSticky Pro also has a state of the art Encryption, to make your Personal Computer Personal again. It is ideal to store banking information, site user names and site passwords, email account setup details. CryptoSticky contains state of the art encryption, that can withstand any decrypting attempt. CryptoSticky can record voice memos on a per sticky basis. Every sticky can have its own voice memo.

---

The voice memo can be edited with the built in sound editor, refining its contents, discarding unwanted portions of the recording. One can also 'doodle' into every sticky, which is especially useful for taking quick notes, jotting down something without much effort. It comes in really handy with tablet PCs.

Drawing on napkins to communicate ideas is in the remote past. Voice memos are not encrypted.

#### **What's New in the CryptoSticky Pro (formerly YellowMemo)?**

CryptoSticky is an easy to use application that helps you to organize. It is primarily meant for keeping your personal details secure. You can create Sticky to keep any types of

---

information, whether it is passwords, your IM logs, logins, bank details, site usernames and passwords, etc. A Sticky is a small envelope or pocket that can be inserted at any place. It can hold one or more items and is usually kept in the pocket of your jacket or pants, but can be used just about anywhere. Sticky is a great invention to store anything convenient to your pockets. You can easily create sticky notes by adding

---

memos, photos, text or drawings. Every sticky can be either public or private. Creating a new sticky is so easy. Just double click the icon on the desktop, you will see the popup dialog box with an empty sticky area on the top. Add any memo, photo, text or drawing by clicking on the My Sticky option. When you have finished, simply close the dialog box by clicking the Cross. A new sticky on your desktop is what you are looking for.

---

Sticky is a wonderful medium to keep notes on site login details, username and passwords that are not easy to write down on paper. When you need to access the site, just open your Sticky and search for the login details. It is almost instantaneous. You can even password protect your Sticky. Just add a password in the Edit Memo menu. The password will be added at the end of the sticky. Your Sticky will only be opened by you once the

---

password is correct. Voice notes can be very useful to take notes and jot down notes. You can record voice notes on a per sticky basis. When you are finished recording, you can edit the contents. The sound editor is easy to use and can be used to remove unwanted portions from the recording. Features of CryptoSticky Pro 1.3.3: \*

- \* Encrypted voice memos \*
- \* Different storage options for Stickers and sticky notes \*
- \* AES encryption when

---

converting files to \*.utf8  
format \* Ability to use color  
codes to categorize Stickers  
and sticky notes \* User can  
create Sticky notes (Answers  
the voices of "Hey you) \* User

---

**System Requirements:**
