Blood flow (BF) changes in the neocortex and hippocampus were studied in 35 rats during epileptic seizures induced by lithium-pilocarpine and acutely by kainic acid. In experimental epilepsy, BF in the cortex changed less than 1% in the first 10-15 min; in the hippocampus, 10-40% decreased during epileptogenesis, and then increased gradually and to normal levels. These changes, however, were not significant when measured by a quantitative method. During seizures induced by kainic acid, BF in the hippocampus diminished to about 80% of the normal value during the first 20 min, and then it returned to the normal value in 40-45 min. During seizures induced by lithium-pil

Users can now share folders on both Windows and Mac platforms via Send To. To be precise, it's now possible for a computer running the Send To app on Windows to open a folder on a Mac running OS X and vice versa. Access the file or folder on Windows by selecting Open with Send To or selecting a different folder on the Mac to share with. The tool can also add files from one computer to the Send To app on another. How you do this is almost identical to accessing a folder by double-clicking the file. Simply add the file to the desired folder and you're done. You could now open the folder in the Send To app on your Mac using the Open With... feature. When you've shared the folder successfully, you can right-click it and select Get Info for some information on the file or folder. Developed for Mac OS X 10.8 Mountain Lion (10.8), this update lets you access files on your PC in the native Mac way. You can open files with applications and more, including drag & drop. You can access the feature by using Go to & Find in the Send To app. Connect to Windows via Remote Desktop, and access any folder on your PC. Connect to Windows via Remote Desktop, and open or browse folders and files. If you have a folder open in the Remote App on your Mac, you can view files inside of it on your PC. Here you can select the location (either drag-and-drop or from a dropdown menu), enable VNC, enable advanced sharing, and more. Find out more about what the developers have to say about the update by clicking here. Download Send To for Mac, and discover how you can use this handy feature to share files easily. Homebrew Applications: Send to (drag and drop) - I'm not 100% sure whether this is correct but I think it can be found in Source: I'm not 100% sure whether this is correct but I think it can be found in Version 0.1.2 of brew which I believe is the latest version:
