Government support There are a large number of government agencies that produce or use AutoCAD including, but not limited to, United States federal government (e.g. National Park Service, Bureau of Land Management, United States Forest Service, United States Army Corps of Engineers), state, city and county governments (e.g. Alameda County, California), private and non-profit entities (e.g. Marriott International, DuPont), international organizations (e.g. ISO, UN). In the US, a user does not need a license to use AutoCAD, unless a school or business is a government entity. In Australia, the design of buildings and other large structures are the responsibility of the Commonwealth and Australian state governments, under the Building Code of Australia and Australian Building and Construction Commission. They provide a BCA Licence to practice as a registered building professional engineer and build structures meeting the standards and requirements set by these commissions. In Australia, a building is a structure or assembly of buildings. Architects, mechanical engineers, building inspectors, building managers and many other professions are regulated and licensed by a state government. There are around 1.3 million building professionals registered across Australia, most of which are in the state of Victoria. In Canada, the building industry is a legal requirement to become a registered professional building contractor in each province. The object of the legislation in each province is to protect the public by establishing and enforcing minimum standards. A building contractor is responsible for the planning, construction, and supervision of building projects. Anyone who intends to engage in building work must be licensed by the province in which they are working. A person is licensed as a building contractor or designer in Canada if they are licensed by the Province of their primary place of business in Canada. A person is licensed as a building contractor or designer in British Columbia, Alberta, Saskatchewan, Ontario, and Quebec if they are licensed in their home Province. In Finland, a building is owned by a private owner, a government body, an organization that is responsible for a property, an organization that is responsible for an area or a group of people. The public services are provided by a private body (e.g. a public transit organization, a water or energy supplier, an organization that ensures the safety of a public place). There are two kinds of state: A state is responsible for welfare and security of the people in general. B) A state is responsible for a person or an area. A state includes the country, the ca3bf1094
