
Havit Usb Joystick Driver Hv G61 13

Did you manage to use vibration with windows 10? When I go to control panel/adjust USB game controllers/properties/vibration test - then... I get a lot of errors and I can't even add more. I must do it again. So I tried. Turn off vibration. Go to control panel/power settings and disable vibration. Press FN + F1 and F2 to vibrate. Press FN + F2 and F3 to vibrate. Then press FN + F1 again. Here is what I get when I follow these steps.(Press FN + F1 and F2 for vibration) Press F4 to vibrate in the top left corner. Press F5 and F7 to vibrate in the upper right corner.
