the working version is 1.0.9, which is the newest release available in their site. you have to download the.msi file, and double click it to install it. i got an error message saying that i didn't have sufficient

rights to do that. but when i started inventor and opened the program, i was prompted to click the install button. so you have to get the.msi file, double click it, and then close inventor before you try to open the program again. i think the latest version is 1.9. otherwise,

the others, 1.8 and 1.7, won't work. no, it doesn't work for me. it opens fine, however when i open the program i get a message box that says "inventor can't find the filter for the mesh. mesh filtering not possible" i tried repairing, but that didn't fix it. then i

realized that the last version of inventor that i have is 3.0.2 and not the latest version. please try it out and let me know. no i just want to make sure that i'm not going crazy. i'm wondering why some things seem to work and others don't. i'm doing the install

because i want to be able to use the software to design my own toys and other things that i could possibly sell. the software in itself does not seem to run correctly. for example, it opens fine, but when i click on the menu for "inventor" it opens an empty

document. i keep getting the message that it can't find the mesh filter. i'm sorry if i'm not making sense. if you are able to help me that would be great! i tried to install the software and it opened the install dialog box, the second time i tried it, it said "the software has

been updated. please
restart the program to
finish the installation" but
when i closed inventor, it
didn't say that i had an
updated version. i tried to
restart the program
several times, but the
dialog box never came
up. any help would be
great. i tried to make

sure that i was installing
the latest version and
when i went to the
download section, it said
that the version i had was
the latest. 5ec8ef588b
