Nissan Datascan 16 [BEST] Cracked

September 19, 2549 BC - 1.5 Can be purchased with advisory cables.. Have you tried linking obd scantech with ECU ID ED and not EF? (No, I haven't tried it. I probably won't, unless I hear about it from someone.) oval. And I did it. Now I use this system for diagnostics. But I was never able to get obd scantech to associate the same ECU ID with the adapter. What is the problem, I still did not understand, but it seems that the point was that obd scantech has a completely different connection scheme. After I made this "tune-up" everything worked fine.
