## [REPACK] Download Ali Mini Upgrade 6.10

The software downloads on this page are provided for use by TriCaster, 3Play, and TalkShow owners only. NewTek does not represent that these downloads are suitable for any specific purpose or use. Most downloads are applicable to certain products or systems running specific software versions only and should not be installed on products or versions to which the user does not have license. Ensure that your USB memory stick is formatted using FAT32 (with an MBR) otherwise the update file will not be detected. When updating please ensure that your THEA500 Mini only has one Gamepad connected and we recommend unplugging the mouse. Do not plug the USB stick into a USB hub to perform the update. See the FAQ for further details. Its really difficult to work out that all you want new users to do is go to a specific webpage (not check here if you have the right firmware -> download firmware from here) extract two zips, locate three file (incidentally the DuetWebControl is currently AWOL and both zips have web pages of 404 errors), upload them in any order and then execute a M997 S0:1:2 command. Tazer JL current release is 11.3.8. No Beta available
