
Treasure Chest Corps- Hack

the anonymous hacktivist group has attacked the u.s. department of homeland security, the brazilian government, the tunisian government, the government of zimbabwe, and many others. most recently, the anonymous branch of operation antisecc breached the servers of nato, stealing around a gigabyte of data. they claimed that the information was so sensitive that they are not going to release all of it, claiming that it would be irresponsible. although they were probably just trying to be funny, some information can be elicited from this. first of all, it seems that the hack took four hours and was kicked off by a network audit, followed by an audit on the web applications. the web application audit is probably what caught the sql injection vulnerability in the first place. network infiltration followed and an sql dump was then taken. prices in this invoice are an indication of how much effort was involved in each of the activities. after beating the first boss, you'll reach a place where the cybertronians are being imprisoned. there is a room with a chest. once you have the means to open the chest, go to the cyberdeck and open it. let the chest open and insert the metal plate. open the next chest, and let the chest open again. insert the metal plate, and open the next chest. insert the plate again and open the chest. insert the plate one more time and open the chest. insert the plate a third time and open the chest. there is a laser trap, so be careful while doing this. while doing this, you'll notice that the chest in the first room is still open. well, this is a huge clue to what you need to do. return to the elevator room and activate the power generator, then head back down to the first room. open the chest and collect the item. go back to the first room and insert the item in the chest. now, open the chest and collect the loot. go back to the elevator room and activate the power node, then return to the first room. insert the item in the chest and open the chest. collect the loot.
