With ever-improving interface and features such as Video Mask Creator, Text Masks, Selective Vectorscope, LUT profiles and more, Pinnacle 23 is out of service. When launched, the program freezes for a few seconds, and then closes. This can happen even with the lowest version of the .NET Framework. In addition, there are several performance issues.

In particular, when working with some video files (for example, HDV), artifacts are observed in the image. However, there are some versions that can work with these files without problems. I have tried installing Pinnacle Studio 23 and Pinnacle Studio 23 HD with no result.
