
Sacred 2 Ice And Blood Crack 2.65.2 High Quality

we've added a few nice things. the most obvious new feature is that you can now order your room-mate. you can tell us who it should be. if you just want the roommate, you can select just that from the menu. otherwise, you can select a guest with some nice options. you can tell it what to wear. we've added several items to the game. including some nice-looking food. there are also a number of new tools which let you analyze how the game runs. you can save a session and load a specific one. you can even chat with other players while the session is paused. the game can save your session automatically. and you can now download the older versions of the game for free. new: sacrifice called out as the right item to use to start the elementalist battle (https://youtu.be/3_ggyp_45dm?t=3m26s) sacrifices for each of the elements - priest, demonologist, elementalist, ranger. you will get a specific slot based on your spec and you can bind the sacrificed item in the slot. no longer be worried about keeping up with out of date knowledge or just not knowing what to sacrifice. just sacrifice and see what item your sacrificing to get the slot. we also made elementalist damage a lot better if you are taking shield of the elements. the shield now has its own button and its own focus. the item itself does a lot and is much easier to control. elementalist area will now also have a dot on it. it will glow red when it is right next to you and blue when it is around. you can now focus on the area you are in (come on you wouldnt be using an elementalist would you?) ranger has acquired the ability to run and hide in bushes. this will allow you to open up your attack timing on other players. we added some internal testing to this as well as a changelog explaining what was added. more game information is available on website.
