ROBOTC for VEX Robotics 4.x allows users to program both the VEX Cortex and the VEX IQ robotics platforms. ROBOTC users learn key skills that easily transition to the real world, industry standard C-Programming languages used by professional engineers and computer scientists. The ROBOTC Intermediate Programming for LEGO MINDSTORMSEV3 Curriculum is a curriculum module designed to teach core computer programming logic and reasoning skills using a robotics context. The curriculum consists of two basic chapters (Motion and Sensing) and three Challenge Chapters (Pipeline Explorer, Barcode Scanner, and Automated Car Park) Each chapter is broken into units that teach key robotics and programming concepts. Additionally, there is a huge amount of support for teachers competing in Robotics Competitions for the first time included in the teachers guide.
