This tile-based set-up can use just about any size imaginable. The update improves the new Quick tool improvements such as the Quick "Forward" and "Backward" interface, improves the interface for using the most powerful table tools with the ability to apply live data, produces a 3D experience when you work in 3D and eases your ability to quickly and easily save a duplicate of the layout panel. You can also edit a layout pattern with one click, it's amazing. Other new features include layers within groups, a new Artboard feature that allows multiple images to be flipped, resized, or flipped and resized, and the Assistant is getting smarter.
